

1. Match Up
2. Meet other individuals that are interested in the same things as you. Skip swiping through endless profiles and find people who you can actually connect with.
3. This is an application that allows users to connect with other people on more specific terms than just Tinder or other traditional dating applications. Depending on what you like to do you can find others that like to do the same thing, whether that be going to a new bar on the weekend or just playing video games. In addition, this app can also be used for things such as finding roommates and other scenarios where finding other individuals in the same area looking for something specific can be difficult to find other people looking for the same thing.

4.

The image is a wireframe design of a mobile application interface, divided into three vertical panels.

**Left Panel:**

- Header: A hamburger menu icon (three horizontal lines) on the left, the text "Person Name (Category)" in the center, and a close icon (an 'X') on the right.
- Content: A rectangular box containing the text "Hello!".
- Bottom: A rectangular input field labeled "Message" and a blue double-headed vertical arrow icon to its right.

**Middle Panel:**

- Header: A close icon (an 'X') at the top center.
- List: A vertical list of items. The first two items have a square icon with an 'X' on the left and the text "Profile" and "Settings" respectively. The next three items have an ellipsis "..." on the left.
- Right Side: To the right of the list items are labels: "our area", "n", "n", "n", "n", and "n" (aligned with the first six items of the list).

**Right Panel:**

- Header: The text "Sign up" at the top center.
- Form: A series of input fields for "Full Name", "Email", "Password", and "Confirm Password".
- Bottom: A rectangular button labeled "Create Account".
